FDD Abstract of

SILICON USED BY THE SIEMENS-PLANIA PLANT (3 pp; Russian; undated)

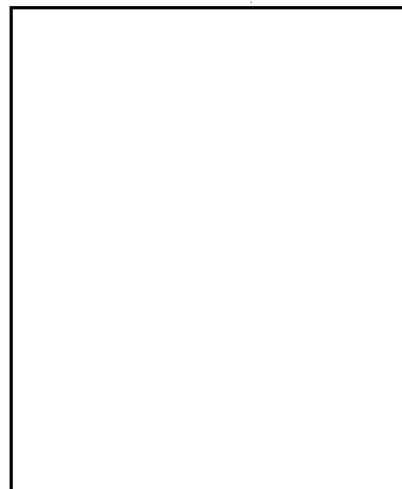

[REDACTED] (1X)

page report submitted by SAG (Soviet Corporation) Kabel in response to an inquiry from GUSIMZ dated 23 October 1951. The report is signed by Volynets, chief of the Technical Production Division of SAG Kabel, and contains information concerning the silicon (Silit) used by the Siemens-Plania plant. It describes the varying carborundum content, the temperature of annular furnaces, and the technical characteristics of materials used for the production of Silit (silicon carbide, pure silicon, and kaolin).

25X1A

[REDACTED] GUSIMZ is the Russian abbreviation for the "Main Administration of the Soviet Property in Foreign Countries", located in Berlin-Weissensee.
